## SACAGEBEEA

WHEN DISASSEMBLING ALUMINUM EXTRUSION, TIGHTEN ALL
SETSCREWS AND LOCKS TO PREVENT LOSS DURING SHIPPING

## SACAGAEEFEA

## Using You Set-up Instructions:

The Visionary Designs Set-up Instructions for Sacagawea displays are created specifically for your configuration. They are laid out sequentially, including an exploded view of the entire display and a logical series of detailed steps for assembly. We encourage you to study the instructions before attempting to assemble your exhibit.

THIS IS VERY IMPORTANT!
Each page reminds you to tighten the setscrews after disassembling your exhibit to prevent loss of the locks and setscrews (see below in red).

## Cleaning \& Packing Your Display:

1) Use care when cleaning aluminum extrusions or acrylic inserts. Use only non-abrasive cleaners
2) When cleaning laminate inserts or counter tops, use mild cleansers and a soft material such as cotton
3) Keep all display components away from extreme heat and long exposure to sunlight to avoid warping and fading.
4) Retain all packing materials. It will make re-packing much easier and will reduce the likelihood of shipping damage.

Detail B: Each extrusion contains a numbered label that corresponds to set-up instructions. The label is located within a groove of the extrusion (when possible). Visiona specified.

Horizontal Connection

Detail C: A rectangular connection bar with plastic T Knobs is inserted between two horizontal extrusions joined end-to-end. Turn the knobs clockwise to tighten Do Not Overtighten.

Hex Key Tool

Most visionary design exhibits can be assembled with the supplied Hex Key Tool. Occasionally, a flat head screwdriver may be required.

Detail A: Most horizontal extrusion connections have a patented expandable lock. This lock inserts into the groove of an opposing extrusion. Tightening the lock with the Hex Key Tool expands the lock and creates a strong positive connection.

Detail D: Attach vertical extrusions to base plates with supplied bolts inserted through the hole in the plate. Be careful not to strip the thread.

Detail E: A square connection bar with plastic T Knobs is inserted between two vertical extrusions joined end-to-end. Turn the knobs clockwise to tighten.
Do Not Overtighten.

Detail F: Plastic Star Knobs are used to tighten locks where used to tighten locks where horizontal extrusions connect with clockwise to tighten. Turn counter lockwise to loos. but do not remove knob.
Do Not Overtighten.

Steps:

1) Attach base plates [1] to lower verticals [ $2 a, 3 a, 2 c, 3 c$ ] with bolts.
2) Connect upper verticals [2b,3b,2d,3d] to lower verticals [2a,3a,2c,3c] with connection bars [b].
3) Connect horizontals $[4 a, 4 b]$ and $[5 a, 5 b]$ with connection bars [a].
4) Connect vertical assemblies [2a/2b,3a/3b,2c/2d,3c/3d] with horizontal assemblies [4a/4b,5a/5b] and horizontals $[4 \mathrm{c}, 5 \mathrm{c}]$ as shown
5) Connect angled verticals [6a,6b] to upper verticals as shown
6) Attach graphics to velcro on back side of frame.

Item Qty. Description
14 Base Plate
2a/2b $1 / 1 \quad 42$ " Vertical Extrusion w/ A10 Clamps
3a/3b 1/1 $42^{\prime \prime}$ Vertical Extrusion
2c/2d 1/1 42" Vertical Extrusion
3c/3d $1 / 1 \quad 42$ " Vertical Extrusion w/ A10 Clamps
4a/4b $1 / 1 \quad 45$ " Horizontal Extrusion
$\begin{array}{lll}4 \mathrm{a} / 4 \mathrm{~b} & 1 / 1 & 45 \\ 5 \mathrm{a} / 5 \mathrm{~b} & 1 / 1 & 45^{\prime \prime} \text { Horizontal Extrusion }\end{array}$ $4 \mathrm{c} / 5 \mathrm{c} \quad 1 / 1 \quad 24$ " Horizontal Extrusion 6a/6b 1/1 2.5" Angle-Cut Vertical

Wing Attachment Slide A10 Clamp into groove of square extrusion

When desired location is found, tighten set screw to secure.

Tighten black plastic set screw to secure Wing in place.

Steps:

1) Attach lights as indicated.
2) Attach wings to A10 clamps as shown.
